Profile

Electronics and Communication Engineering student with strong knowledge of software development fundamentals and hands-on experience in building web-based and database-driven applications.Proficient in Java (OOPs), HTML, CSS, MySQL, React, Spring Boot Framework and REST APIs. Good Understanding of object-oriented programming, Software Development Life Cycle, frontend development, backend development, and database design. Quick learner with strong problem-solving skills, teamwork ability, and a keen interest in developing scalable and efficient software solutions.Seeking an opportunity to apply technical skills and grow as a software engineer in a professional environment.

Education

B.E. Electronics and Communication — **Belagavi, Karnataka**
KLS Gogte Institute of Technology — *2022-2026*
CGPA: 8.61

Pre-University — **Belagavi, Karnataka**
RL PU College — *2020-2022*
Percentage: 85.3

SSLC — **Belagavi, Karnataka**
M.V.M's English Medium School — *2010-2020*
Percentage: 85.6

Experience

Java Full Stack Intern | 15-Week Internship | Genesis Training (Genplus Training Consulting Services Pvt. Ltd.), Bangalore

- Successfully completed a 15-week on-site Java Full Stack Internship focused on Java, Spring Boot, React, MySQL, Spring Security, JWT, and RESTful APIs. As part of the program, learned modern full-stack development concepts and worked collaboratively in a team to build two full-stack applications, BrickSquare (Smart Plot Investment Platform) and WealthWise (Mutual Fund and SIP Investment Tracking Platform). Developed and integrated RESTful APIs, implemented secure authentication and role-based authorization, designed responsive frontend components, managed relational databases, and participated in debugging, testing, API integration, and performance optimization.

Projects

BrickSquare - Smart Plot Investment Platform

- BrickSquare is a team-based full-stack real estate investment platform developed to simplify plot investment and management for Admins, Builders, and Investors through secure role-based access, plot listings, bookings, KYC verification, EMI calculations, agreements, and notifications. As part of the development team, I contributed to both the backend and frontend of the application. On the backend, I implemented user authentication and authorization using Spring Security and JWT, developing secure login and registration functionalities, password encryption, role-based access control, and RESTful APIs for authentication. On the frontend, I developed responsive React components, integrated backend APIs, implemented authentication workflows, and enhanced the user interface to provide a seamless user experience.

WealthWise – Mutual Fund and SIP Investment Tracking Platform

- WealthWise is a team-based full-stack mutual fund and SIP investment tracking platform developed to help users manage their investments, monitor portfolio performance, track SIPs, and gain insights through an intuitive and user-friendly interface. As part of the development team, I contributed to the frontend development using React, building responsive and interactive user interfaces, integrating RESTful APIs, implementing reusable components, and enhancing the overall user experience through seamless navigation and efficient state management.

Collaborated with backend developers to ensure smooth API integration, maintained consistent UI design across modules, and optimized frontend performance to deliver a responsive and user-friendly application.

Technologies

Languages: Java

Technologies: HTML,CSS, React.js, Spring Boot, RESTful APIs

Databases: MySQL

Concepts: Object Oriented Programming, SDLC

Exposure: MATLAB, Visual Studio Code, MySQL Workbench, Eclipse, AI assisted development tools

Certification

- **Genesis - Java Stack onsite 15 weeks Internship completion certificate**

Hobbies and Interests

Singing

Sketching

Gardening
